

ABSTRACT

A drug dispenser which can push a drug package in a stable state and discharge it. The
5 drug dispenser includes a drug case (1) for containing a plurality of drug packages (100)
stacked in a vertical direction, each of the plurality of drug packages (100) is packed in a
rectangular package with a flange (100a), and a pushing mechanism (3) for pushing out the
lowermost drug package (100) in a horizontal direction. A guide member (35) for
supporting and guiding the flange (100a') of the second drug package (100'), when the
10 lowermost drug package (100) is pushed out, is provided in a pushing direction of the drug
package (100).
